PROJECTS

Weather Forecasting Website.
Link: (https://naveenveera7.github.io/WeatherWise-Your-Global-Forecast-Hub/)
Developed a dynamic Weather Application utilizing HTML, CSS, and JavaScript, which provides real-time weather information for cities worldwide. The application fetches data from the OpenWeather API to display current temperature, weather conditions, humidity, wind speed, and other relevant details. Users can enter a city name to receive localized weather updates.

Student Management System (with Login Validation)
Designed a web application for student and lecturer login validation, with CRUD operations for managing student data. Only lecturers can view and edit student details after login authentication.
Technologies Used: Java, JDBC, JSP, MySQL, Tomcat, CSS

Art Gallery Website.
